EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: One reason for allowance is that the prior art of record does not teach or show the claimed method and apparatus for a core metal of a wet friction material *inter alia* where a steel sheet is stamped to form a wave shape in a circumferential direction by being compressed between a main punch and a counter punch and a micro-protrusion is formed in the steel sheet by being compressed between a punch and a counterpunch. As a result, the core metal of a wet friction material stably achieves a high accuracy of wave shape by a simple process with the processing time being reduced (page 3, lines 9-12, and page 24, first full paragraph, of the specification) over that needed to produce core metal plates of a wet friction material in prior manufacturing techniques (pages 1-3 of the specification).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
